Research comment

The test sample was applied in the amount of 3µl to the BioBasic 8 Thermo Scientific column. During the course of the analysis with the method a linear gradient in the solutions of H2O and Acetonitrile with the addition of 0.1% trifluoroacetic acid, peaks of the sought substances appeared. Their contents, when compared to the reference chromatograms, are shown in the table above. Height the measurement error is +-0,05mg. The actual state of the sample sent before the test is presented on the photo below.
